Innovate Awarding

When you work with Innovate Awarding, you're working with an awarding organisation that sets itself apart – a dynamic company with a collaborative approach to doing business. We're consultative and innovative...everything that our customers say they want an awarding organisation to be.

We're easy to work with, committed and passionate about exceeding our customers' expectations. We're not tied down by bureaucracy and red tape and can think outside the box and respond quickly to our customers' needs.

We have a Performance Pledge that details guaranteed response times. Copies of these can be found on our website www.innovateawarding.org.

Feedback

Your feedback is very important to us. We're always open to suggestions when it comes to enhancing and improving our services, products and systems. Email us at contactus@innovateawarding.org or call us on 0117 314 2800.

Complaints

If we do get things wrong, we'll make every effort to resolve your issues quickly and efficiently. If you'd like to raise a formal complaint then we recommend you read our Complaints Procedure which can be found on our website.

Fees

Our fees structure is transparent and straightforward. Our fees are published on our website in a clear format with no hidden charges. Unlike other awarding organisations, we do not charge an annual centre fee. Visit our website to compare our fees.

Enquiries and Appeals

We recognise that sometimes decisions are made that a centre (or learner) may wish to appeal. We have an Enquiries and Appeals Policy and Process on our website that sets out guidelines on grounds for appeal and the process.

Data Protection

Innovate Awarding takes the protection of data seriously; we have a data protection statement outlining how we and our centres, comply with the current legislation on data protection. This statement can be found on our website.

Equality and Diversity

Innovate Awarding is committed to giving everyone who wants to gain one of our qualifications an equal opportunity of achieving it in line with current UK legislation (Equality Act 2010) and EU directives.

Centres are required, as conditions of approval, to use an equality and diversity policy that works together with ours and that they maintain an effective complaint and appeals process. We expect centres to tell learners how to find and use their own equality and diversity and appeals processes. For information, please visit our website.

Reasonable Adjustment and Special Consideration

All learners must be treated fairly and equally and be given every opportunity to achieve our/the qualifications. A copy of our policy on Reasonable Adjustments and Special Considerations, and application form, can be found on our website.

Malpractice and Maladministration

Innovate Awarding has a responsibility to do everything it can to prevent any malpractice or maladministration from occurring, and where it has already occurred, ensuring action is taken proportionate to the gravity and scope of the occurrence.

A copy of our policy and procedure on Malpractice and Maladministration is available on our website.

Recognition of Prior Learning (RPL)

RPL recognises how the contribution of a learner's previous experience could contribute to a qualification or unit. Innovate Awarding have produced guidance on RPL and this can be found within our Information and Guidance for Centres on our website.

Please note the above is not a comprehensive guide to running IAO qualifications. Once approved centres must adhere to the Centre Agreement and Information and Guidance for Centres.

The Regulated Qualifications Framework (RQF)

What is the RQF?

The Regulated Qualifications Framework (RQF) is an Ofqual regulated system of cataloguing qualifications. Qualifications on the RQF can be found by their size or level. Qualifications at a given level can differ depending on their content and purpose.

All of Innovate Awarding's qualifications are on the RQF.

Qualification Level

The level reflects the challenge or difficulty of the qualification. There are eight levels of qualification from 1 to 8, supported by three "Entry" levels.

Qualification Size

The size of a qualification reflects the estimated total amount of time it would take the average learner to study and be assessed. The size of a qualification is expressed in terms of Total Qualification Time (TQT). The time spent being taught or supervised, rather than studying alone, is the Guided Learning Hours (GLH).

Qualifications can sit at different levels, but require similar amounts of study and assessment. Similarly, qualifications at the same level can take different amounts of time to complete.

Credit values

Every unit and qualification on the RQF has been given a credit value, which denotes the number of credits that will be awarded to each candidate who successfully completes the unit or qualification.

- **1** credit represents **10** notional learning hours

Notional learning hours represent the amount of time a learner is expected to take, on average, to complete the learning outcomes of the unit to the standard required within the assessment criteria. It is important to note that notional learning hours is not the same as guided learning hours (GLH). GLH represents the hours during which a tutor or trainer is present and contributing to the learning process. Notional learning hours represents the hours which are needed to successfully cover all the learning required to achieve the unit, either guided or independently.

RQF terminology

Whilst the evidence outcomes required from RQF and NVQ units are the same, the RQF units use different terminology to the NVQ units. The assessment criteria for NVQ units are 'what you must do' and 'what you must know' whereas the RQF units are all 'the Learner can' or 'the Learner is able to'.

Rules of Combination (RoC)

Every qualification on the RQF is structured through Rules of Combination. Rules of Combination are important because they define the number of credits which need to be achieved and where these credits must come from in order for a Learner to achieve the qualification. Rules of Combination also state what the potential is for Learners who wish to transfer credits between qualifications and awarding bodies.

Skills for Care and Development RQF Assessment Principles

1. Introduction

1.1 Skills for Care and Development (SfC&D) is the UK sector skills council (SSC) for social care, children, early years and young people. Its structure for realising the SSC remit is via an alliance of six organisations: Care Council for Wales, Children's Workforce Development Council, General Social Care Council, Northern Ireland Social Care Council, Scottish Social Services Council and Skills for Care.

1.2 This document sets out those principles and approaches to RQF unit/qualification assessment not already described in the Regulatory Arrangements for the Qualifications and Credit Framework. The information is intended to support the quality assurance processes of Awarding Organisations that offer qualifications in the Sector, and should be read alongside these. It should also be read alongside individual unit assessment requirements. Additional information/guidance regarding individual unit assessment can be obtained from Awarding Organisations, or from Skills for Care and Development. This must be used in order to provide the proper context for learning and assessment.

1.3 These principles will ensure a consistent approach to those elements of assessment which require further interpretation and definition, and support sector confidence in the new arrangements.

1.4 Where Skills for Care and Development qualifications are joint with Skills for Health, Skill for Health will also use these assessment principles.

2. Assessment Principles

2.1 Assessment decisions for competence based learning outcomes (e.g. those beginning with 'to be able to') must be made in a real work environment by an occupationally competent assessor. Any knowledge evidence integral to these learning outcomes may be generated outside of the work environment but the final assessment decision must be within the real work environment.

2.2 Assessment decisions for competence based Learning Outcomes must be made by an assessor qualified to make assessment decisions.

2.3 Competence based assessment must include direct observation as the main source of evidence

2.4 Simulation may only be utilised as an assessment method for competence based LO where this is specified in the assessment requirements of the unit'.

2.5 Expert witnesses can be used for direct observation where: they have occupational expertise for specialist areas or the observation is of a particularly sensitive nature. The use of expert witnesses should be determined and agreed by the assessor.

2.6 Assessment of knowledge based Learning Outcomes (e.g. those beginning with 'know' or 'understand') may take place in or outside of a real work environment.

2.7 Assessment decisions for knowledge based Learning Outcomes must be made by an occupationally knowledgeable assessor.

2.8 Assessment decisions for knowledge based Learning Outcomes must be made by an assessor qualified to make assessment decisions. Where assessment is electronic or undertaken according to a set grid, the assessment decisions are made by the person who has set the answers.

3. Internal Quality Assurance

3.1 Internal quality assurance is key to ensuring that the assessment of evidence for units is of a consistent and appropriate quality. Those carrying out internal quality assurance must be occupationally knowledgeable in the area they are assuring and be qualified to make quality assurance decisions.

4. Definitions

4.1 Occupationally competent:

This means that each assessor must be capable of carrying out the full requirements within the competency units they are assessing. Being occupationally competent means they are also occupationally knowledgeable. This occupational competence should be maintained annually through clearly demonstrable continuing learning and professional development.

4.2 Occupationally knowledgeable:

This means that each assessor should possess relevant knowledge and understanding, and be able to assess this in units designed to test specific knowledge and understanding, or in units where knowledge and understanding are components of competency. This occupational knowledge should be maintained annually through clearly demonstrable continuing learning and professional development.

4.3 Qualified to make assessment decisions:

This means that each assessor must hold a qualification suitable to support the making of appropriate and consistent assessment decisions. Awarding Organisations will determine what will qualify those making assessment decisions according to the unit of competence under assessment. In any case of significant uncertainty the SSCs will be consulted.

4.4 Qualified to make quality assurance decisions:

Awarding Organisations will determine what will qualify those undertaking internal quality assurance to make decisions about that quality assurance.

4.5 Expert witness:

An expert witness must:

- have a working knowledge of the RQF units on which their expertise is based
- be occupationally competent in their area of expertise
- have EITHER any qualification in assessment of workplace performance OR a professional work role which involves evaluating the everyday practice of staff.

Qualification Structure

Learners must achieve 61 credits. 53 credits must be achieved from Mandatory Group A. Learners must also complete a minimum of 3 Optional Units from Optional Group B, to achieve a minimum of 8 credits.

Additional information about this unit

Key people are those who are important to a child or young person and who can make a difference to his or her well-being. Key people include family, friends, carers and others with whom the child or young person has an important relationship

Others may include:

- Team members
- Other professionals

Consistent support requires agreed responses to be made by all those involved in the care of a child or young person

Activities should be selected to ensure they are stimulating to and achievable by the child or young person

Agreed interventions should be designed to minimise the impact of the behaviour on the child or young person and those around them

Physical intervention refers to methods of controlling children and young people that do not involve any use of force, e.g. offering a 'guiding hand' to lead away from a harmful situation, or to block the way to prevent a child or young person putting themselves in danger.

Restraint is the use of, or threat to use, force, or the restriction of a child's liberty of movement (whether or not they resist), to prevent injury to any person or serious damage to

property. From April 2015, a definition of restraint can be found in the children's homes regulations.

Additional information about this unit

Learning outcomes 5, 7 and 8 must be assessed in the workplace.

Agreed ways of working will include policies and procedures where these exist

An **individual** is someone requiring care or support

Active participation is a way of working that recognises an individual's right to participate in the activities and relationships of everyday life as independently as possible; the individual is regarded as an active partner in their own care or support, rather than a passive recipient

Using medication **correctly** must ensure that the individual receives:

- The correct medication
- In the correct dose
- By the correct route
- At the correct time
- With agreed support
- With respect for dignity and privacy

Practical difficulties may include:

- Lost medication
- Missed medication
- Spilt medication
- An individual's decision not to take medication
- Difficulty in taking medication in its prescribed form
- Wrong medication used
- Vomiting after taking medication
- Adverse reaction
- Discrepancies in records or directions for use

Unit aim (s)

This unit assesses support for use of medication in social care settings. It covers broad types, classifications and forms of medication, as well as safe handling and storage. It addresses practical support for use of medication that reflects social care principles and values, and includes the need for accurate recording and reporting.

Assessment requirements specified by a sector or regulatory body (if appropriate)	Units need to be assessed in line with the Skills for Care and Development RQF Assessment Principles
