The Regulated Qualifications Framework (RQF)

What is the RQF?

The Regulated Qualifications Framework (RQF) is an Ofqual regulated system of cataloguing qualifications. Qualifications on the RQF can be found by their size or level. Qualifications at a given level can differ depending on their content and purpose.

All of Innovate Awarding's qualifications are on the RQF.

Qualification Level

The level reflects the challenge or difficulty of the qualification. There are eight levels of qualification from 1 to 8, supported by three "Entry" levels.

Qualification Size

The size of a qualification reflects the estimated total amount of time it would take the average learner to study and be assessed. The size of a qualification is expressed in terms of Total Qualification Time (TQT). The time spent being taught or supervised, rather than studying alone, is the Guided Learning Hours (GLH).

Qualifications can sit at different levels, but require similar amounts of study and assessment. Similarly, qualifications at the same level can take different amounts of time to complete.

Assessment strategy

There is no requirement for each unit to be assessed separately. Assessors are advised to adopt a holistic approach and, where possible, to use one activity as evidence for learning outcomes and assessment criteria for both units. For example, a professional discussion for the unit *Assess vocational skills, knowledge and understanding* might also provide evidence for the unit *Understanding the principles and practices of assessment*. However, it is essential that evidence for the assessment criteria in each unit is identified individually.

Understanding the principles and practices of assessment

The aim of this unit is to assess the trainee assessor's knowledge and understanding of the principles and practices that underpin assessment.

All learning outcomes in this unit must be assessed using methods appropriate to the assessment of knowledge and understanding.

There must be valid, authentic and sufficient evidence for all the assessment criteria. However, one piece of evidence may be used to meet the requirements of more than one learning outcome or assessment criterion.

Assess vocational skills, knowledge and understanding

The aim of this unit is to assess the trainee assessor's performance in assessing vocational skills knowledge and understanding in a workshop, classroom or other training environment rather than assessing competence in a work environment.

There must be evidence to cover all of the assessment methods listed in the unit. As a minimum, there must be performance evidence for at least three of the following assessment methods:

- assessments of the learner in simulated environments;
- skills tests;
- oral and written questions;
- assignments;
- projects;
- case studies; and
- recognising prior learning.

Simulations are not allowed.

Other forms of evidence will be acceptable for the remaining assessment methods. The trainee assessor's performance evidence must be assessed by observation, examining the products of work, questioning or professional discussions.

Remote observation is not acceptable for assessment of assessors; in other words, the assessor and the trainee assessor must be in the same location at the same time when observations are being carried out.

There must be valid, authentic and sufficient evidence for all the assessment criteria. Holistic assessment is encouraged and one piece of evidence may be used to meet the requirements of more than one learning outcome or assessment criterion.

Evidence for this unit must not come from the trainee assessing another trainee assessor who, in turn, is assessing someone else. In gathering evidence for these qualifications, an unqualified trainee assessor is not allowed to assess another unqualified assessor.

There must be evidence of the trainee assessor carrying out at least two assessments of two learner's skills, knowledge and understanding (four assessments in total).

Requirements for Assessors

All those who assess these qualifications must:

- already hold the qualification they are assessing (or a recognised equivalent) and have successfully assessed learners for other Teaching, Learning or Assessment qualifications (if assessing quality assurance roles, they must have experience as a qualified quality assurance practitioner of carrying out internal or external quality assurance of qualifications for a minimum of two assessors);

- hold one of the following qualifications or their recognised equivalent:
 - Level 3 Award in Assessing Competence in the Work Environment; or

 - D34 Internally verify the assessment process; and
- show current evidence of continuing professional development in assessment and quality assurance.

Requirements for External Quality Assurance

All those who externally quality assure these qualifications must:

- hold one of the following assessor qualifications or their recognised equivalent:
 - the Level 3 Award in Assessing Competence in the Work Environment; or

 - V2 Conduct external quality assurance of the assessment process; or
 - D35 Externally verify the assessment process; and
- show current evidence of continuing professional development in assessment and quality assurance.

Best practice would suggest that external quality assurance staff should also hold an appropriate internal quality assurance qualification, either:

- the Level 4 Award in the Internal Quality Assurance of Assessment Processes and Practice; or
- the Level 4 Certificate in Leading the Internal Quality Assurance of Assessment Processes and Practice; or
- V1 Conduct internal quality assurance of the assessment process; or
